

SANDEEP K

+1 913-484-0228 | skandev8@gmail.com | [linkedin.com/in/sandeepdev8](https://www.linkedin.com/in/sandeepdev8)

SKILLS

Programming Languages: C#, Python, Java, JavaScript, TypeScript, SQL

Front-end: HTML, CSS, Javascript, JQuery, ReactJs, Next.js, Angular, Redux, SCSS, Bootstrap, Material UI

Back-end: C#, Python, .NET Core, Node.js, Express.js, WEB API, Microservices, REST APIs, GraphQL, ASP.NET MVC, ADO.NET, Dapper, Entity Framework, SQL Server, Postgres, API Gateway, Polly, Serilog, Async Programming, RabbitMQ, ActiveMQ, Twilio, Sendgrid, Zuora, Dialogflow (Chatbot), Flask, CQRS, MediatR, Logging with Elastic & Kibana, Windows Services, JWT, Basic auth, Token Auth, OAuth2.0, xUnit, NUnit, Moq, Specflow, automated tests

Data: SQL Server, PostgreSQL, MySQL, DynamoDB, CosmosDB, MongoDB, SQL, T-SQL, RDBMS, NoSQL, Stored procedures, Triggers, Functions, Views, Alteryx, Python, Numpy, Pandas and Data Visualization

Cloud: AWS Lambda, S3, SQS, SNS, Cloudwatch, EC2, AWS Batch, Event Bridge, IAM, DynamoDB, QLDB, Secret manager, API Gateway, Athena, Azure App Services, Azure functions, Azure Application Insights, Key vault, Azure SQL, Azure AD B2B B2C, OAuth2.0, Azure Data factory, Azure linked services, Azure data lake storage gen 2, Azure CosmosDB, Azure Table storage, Elastic observability, Terraform

Technologies & Tools: Git, npm, pip, Docker, Kubernetes, GitLab, CI/CD, CLI, Visual Studio, VS Code, SQL Server Management Studio, Adobe analytics, pgAdmin, Postman, fiddler, Swagger, Portainer, Bitbucket, Jira, Azure Devops, Kanban, JSON, YAML, SAML, AMQP, System Design and Architecture, SDLC, TDD, BDD, SOLID Principles, Design Patterns, KISS, DRY, YAGNI

EXPERIENCE

Qlira Jun. 2023 – Dec. 2023
Senior Software Engineer Stockholm, Sweden

- Involved in building reliable payment facilitation for the merchants using serverless event driven microservice architecture system as part of clearing and settlements team.
- Led the integration with SWISH payments, aligning with the ISO 20022 standard (PAIN & CAMT), and successfully implemented reconciliation of transactions for millions of Swedish crowns making settlements to merchants in 24 hours or less and reducing overall reconciliation time by 60%.
- Also worked with Card, Worldline and Trustly payments to integrate and enhance payment processing capabilities and reduce transaction failures by 40%.
- C#, .NET, AWS (lambda, batch, event bridge, SNS, SQS, S3, Fargate, VPC, DynamoDB, QLDB, RDS, PostgreSQL Cloudwatch), Gitlab, Snowflake, xUnit, NUnit, CI/CD, Terraform, Docker, Microservices, Payments.

Zenoti Feb. 2022 – May. 2023
Senior Software Engineer Hyderabad, TS, India

- Worked on the development of a new Onboarding System for small wellness businesses leading to a 40% faster onboarding process and increasing subscription conversion rates by 20%.
- Developed and implemented dot phrases and pre-care post-care instructions functionality, reducing doctors prescription note-taking time by 70% significantly improving operational efficiency in the healthcare and wellness industry. Also built a notification system over email and phone to both prescriber and prescription holder.
- Designed and optimized a comprehensive image management system using AWS S3 and CloudFront, reducing image retrieval time by 40% and enhancing the user experience across various devices including flutter app integration.
- Implemented search across the core Zenoti website with ranking and navigate the user to relevant pages reducing number of clicks by 60%.
- C#, .NET, Angular, ASP.NET, AWS S3, AWS Cloudfront, AWS lambda, AWS EC2, Docker, CQRS, Microservices, SQL Server, Zuora Subscription and payments, SaaS, Twilio, Sendgrid, Jira, Confluence, Automated test, Ocelot API gateway, NewRelic, Unit testing.

Deloitte Apr. 2020 – Jan. 2022
Full Stack Engineer Hyderabad, TS, India

- ReEngineered a scalable application, automating the processing of large volumes of tax documents across multiple formats (pdf, doc, docx, txt, xlsx, jpg, jpeg, png, bmp, tiff, gif, msg), reducing manual efforts by 60% and enhancing throughput. Integrated with OCR to streamline data extraction.
- Worked with Project elevate to manage partners and budget of Deloitte globally. Collaborated with cross-functional teams.
- Angular, .NET, C#, Node.js, ActiveMQ, SQL Server, Azure, RabbitMQ, MSMQ, SAML, OAuth 2.0, CI/CD, Cron Jobs, Thycotic Secret Server, Azure Devops, Azure AD, UnitTests, Veracode

Accenture Innovation Hub Mar. 2018 – Apr. 2020
Software Engineer Hyderabad, TS, India

- Designed and maintained RESTful Web APIs using .NET Core and SQL Server for integrating IOT location data to show on google maps and build custom graphs using D3.js for analytics.
- Worked on SQL Server Database and written custom stored procedure, views, functions, triggers.
- Led the development of an IoT product prototype using Raspberry Pi, iBeacons, and Azure, showcasing innovative solutions to clients and securing additional project funding.
- Built analytics dashboards to measure key metrics using D3.js such as productive time, unproductive time, ferry time, and travel time, facilitating data-driven decision-making.

- Developed an end-to-end chatbot using Dialogflow, integrated with Angular UI and Dialogflow API V2 using python Flask framework webhook, reducing customer service response times by 50%.
- Constructed and optimized Alteryx ETL workflows and scheduled jobs to move and transform the large IOT data with location pings of 15 secs interval.
- Angular, .NET Core, Python, Azure, SQL Server, Alteryx, Azure Data Factory, Google Maps, Spatial Data, Azure Devops, Raspberry PI, Google Dialogflow, Flask, Azure API Management, Azure app services..

KVA Engineering

Aug. 2017 – Mar. 2018

Software Engineer

Hyderabad, TS, India

- Developed web application for electrical systems and oil rigs from scratch. Used mathematical calculations for improving operational equipment choice and rating.
- Utilized Chart.js to create visual insights, enhancing data interpretation and decision-making processes for choosing the right electrical & mechanical systems, reducing the overall time for manual calculations.
- Designed Single Line Diagrams (SLDs) for high voltage (HV) electric systems using ETAP, adhering to IEC/IEEE standards, which improved system reliability by 25%.
- React.js, .NET Core, Azure SQL, Azure active directory B2C OAuth 2.0, Azure App Service.

PROJECTS

Integrated IOT data processing pipeline using AWS and Azure : Developed a cloud data processing and analysis pipeline to process IOT data from vehicle transit data. Implemented data processing across multi cloud systems and seamless data transfer using ETL and other cloud services. Used around 20 different cloud services to build robust architecture, fault tolerant and highly scalable systems.

Ticket booking system : This project is developed as part of Database theory and apps course at UCM. Developed full stack application for movie tickets booking system including database design with end to end application along with handling concurrency control.

Voltage stability and Power oscillation damping using SSSC and SMES : For enhancing the voltage stability and power oscillation damping in multi area systems,. A three area system is taken as a test system and the operation of Static synchronous series compensator with and without Superconducting magnetic energy storage systems is analyzed for various transient disturbances in the MATLAB / SIMULINK environment.

EDUCATION

University of Central Missouri

Masters in Computer Science

United States

Osmania University

Bachelor of Engineering in Electrical and Electronics; GPA: 3.9/4.00

Hyderabad, TS, India

ACCOMPLISHMENTS

Online Learning: Udemy - Microservices, D3.js, Machine Learning, .NET, Angular, ReactJs | LinkedIn Learning - Communication across cultures, Effective learning | Pluralsight - .NET, Cosmos Db, Azure

Certifications: Microsoft Certified Professional (MCP), Azure fundamentals (AZ-900), Programming in C# (70-483), Data Scientist with python track (Datacamp), Alteryx designer core ETL, Scaled agile 5.0

Achievements: Received applause award twice for high performance in deloitte | Passionately kept learning and completed 1000+ course hours from multiple learning platforms

Volunteer: Disaster response team at accenture | Social hearts volunteer
